Delhi	>> Regular vertical profiles from T.Machida program (commercial aircrafts)					

Carbon Fluxes in India and Central Asia

CaFI^{CA}

Sampling: B.C. Bhatt (IIA, Bangalore)
D. Angchuk (IAO, Hanle)

Flask Sampling: 2002 onwards

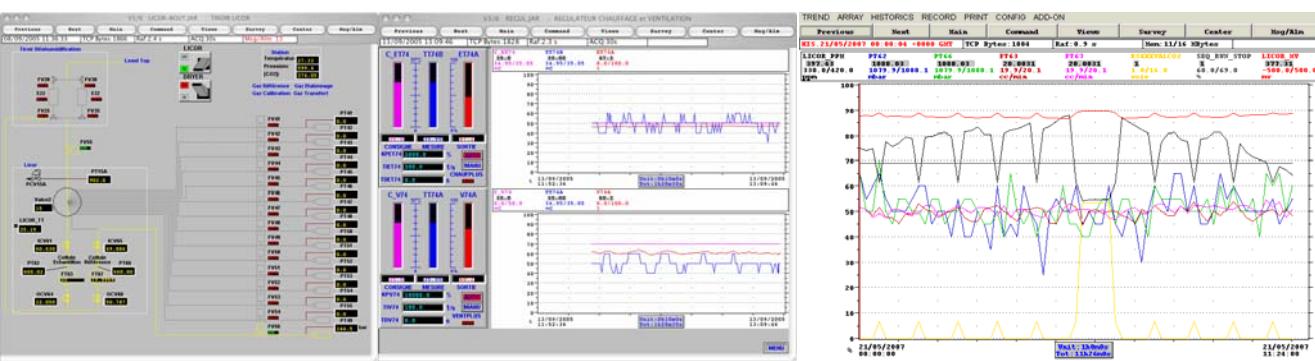

In-situ: 2005 onwards

Analytical lab: LSCE, France

Indian Astronomical
Observatory, Hanle

Running the Hanle station

1. Remote control of the CO₂ analyzer

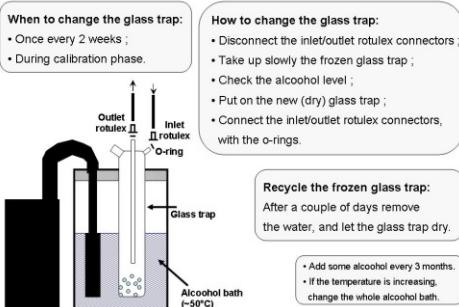

GUIDELINES FOR THE REGULATORS

2. Support from IIA engineers & infrastructure

GUIDELINES FOR THE DRYING SYSTEM

[om/PDFFiles.nsf/0/af277a8381ad585285256a0d0056e35f/\\$FILE/3044.pdf](http://om/PDFFiles.nsf/0/af277a8381ad585285256a0d0056e35f/$FILE/3044.pdf)

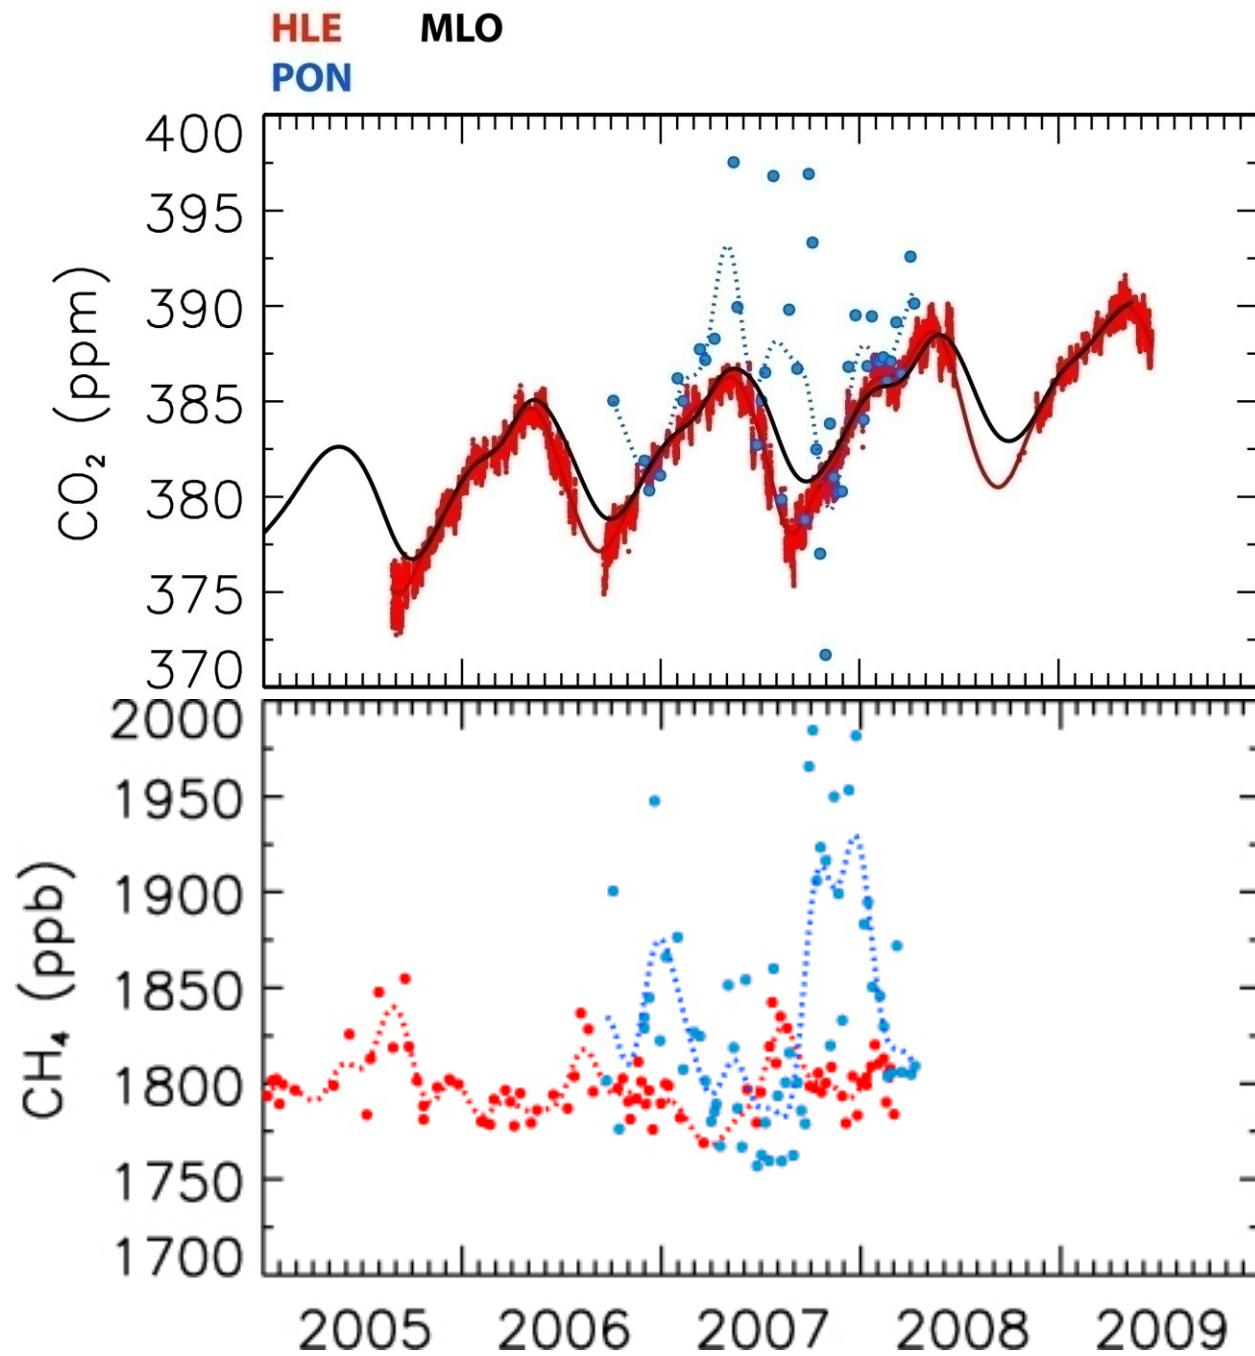

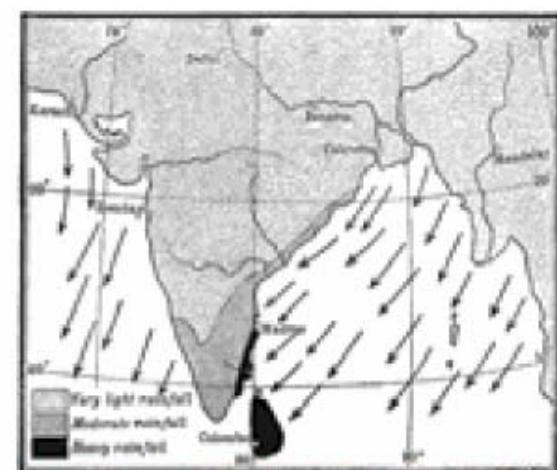

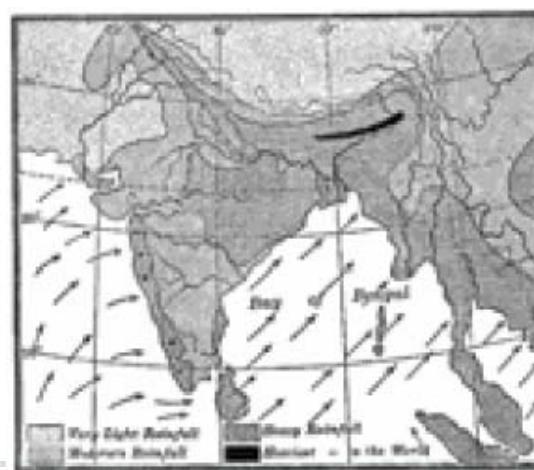

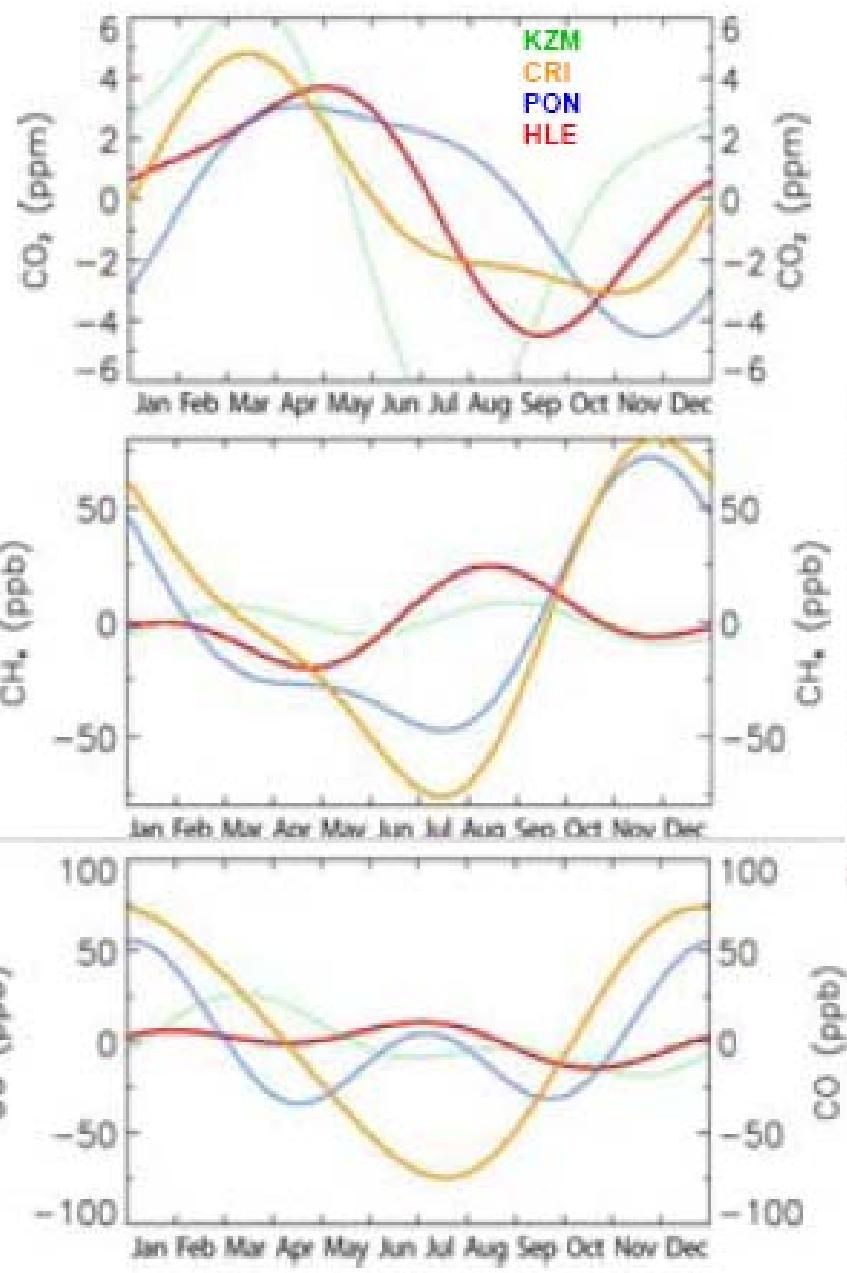

Pondicherry
University

Sampling: Swati patnaik (Pondicherry Univ.)
M.V. Reddy (Pondicherry Univ.)
Flask Sampling: 2006 onwards
Analytical Lab: LSCE, France

National Institute of Ocean Technology, Port Blair *(Andaman Islands)*

Sampling: R. Kirubagaran, (NIOT,
Chennai)

D. K. Jha (NIOT, Port Blair)

B.C. Bhatt (IIA, Bangalore)

Flask sampling: 2009 - ...

In-situ: CO₂, CH₄, CO (2010 - ...)

Analytical Lab: LSCE, France

Cape Rama

Sampling: D.V. Borole (NIO, Goa)

Flask sampling: 1993 - 2002

2009 - ...

Analytical Lab: CMAR, Australia

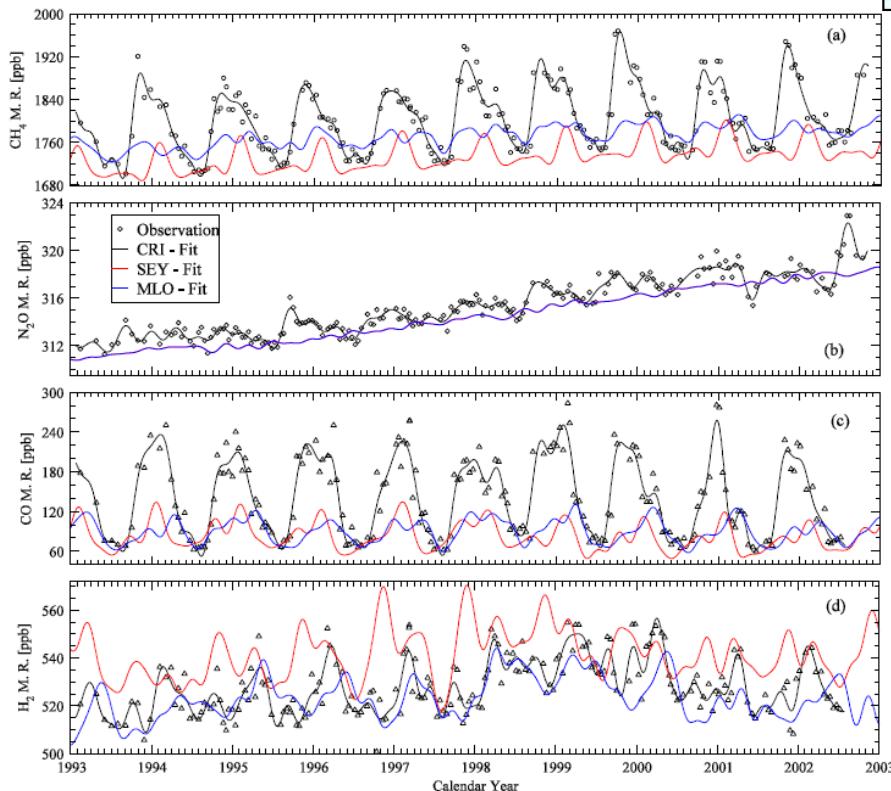

Figure 3: Same as Fig. 2, but for CH_4 , N_2O , CO and H_2 . Smoothed fits to the Mauna Loa (blue line; data source: CMAR) or SEY data (red line; except for N_2O ; data source: ESRL) are given for comparison.

Aryabhatta Research Institute Of Observational Sciences, Nainital

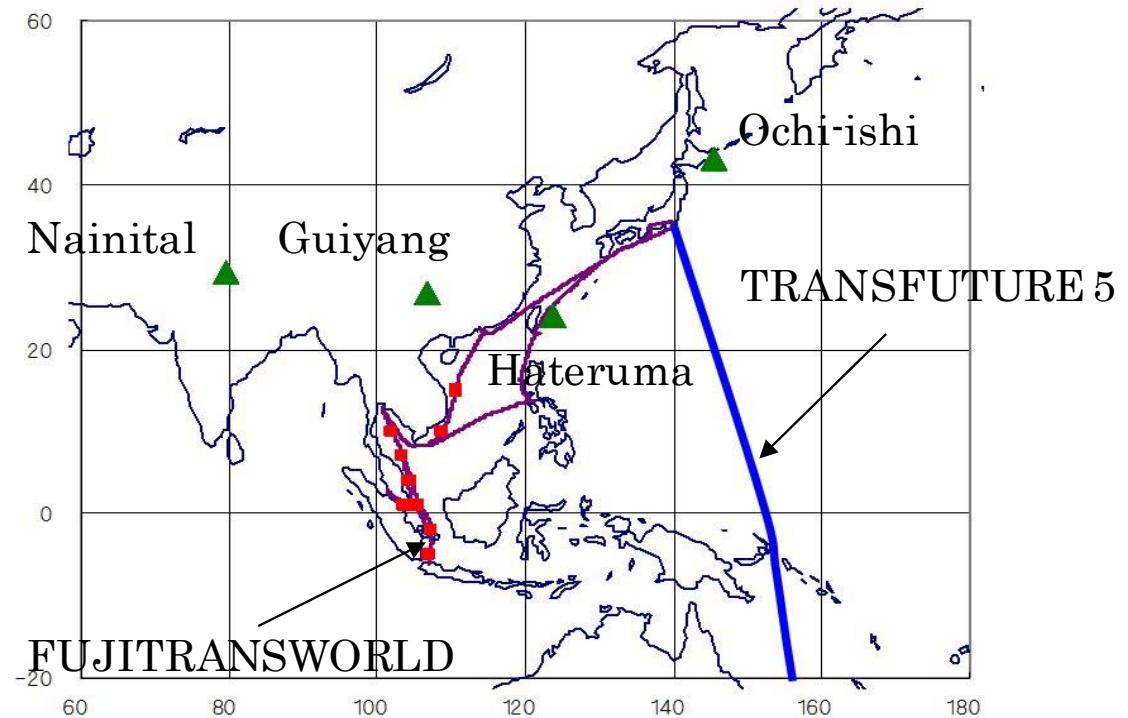

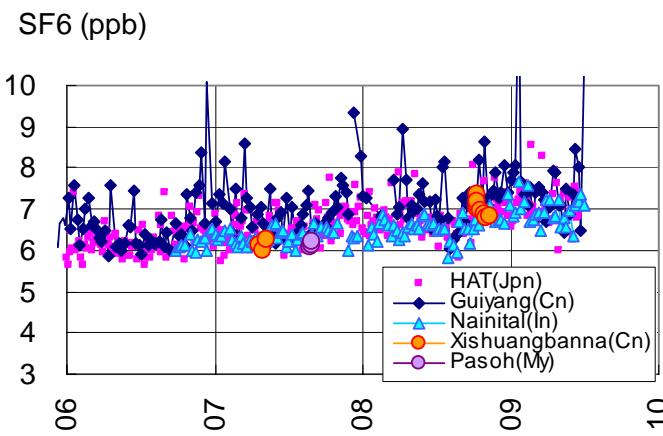

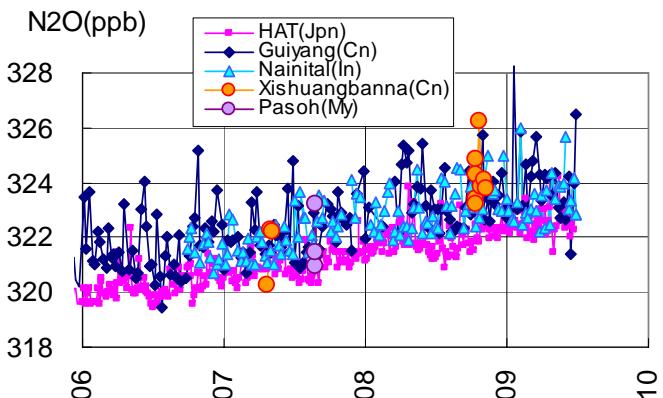

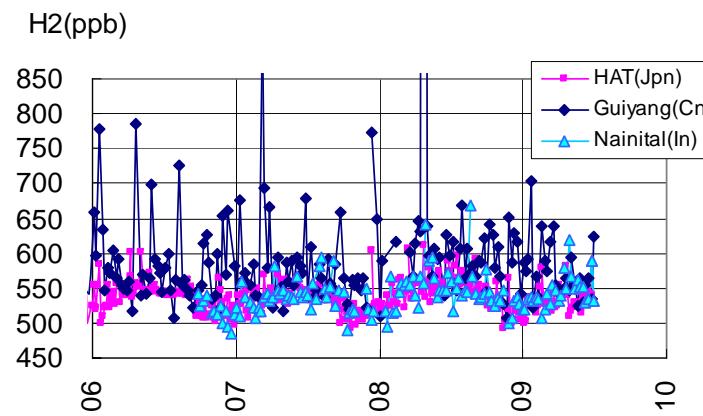

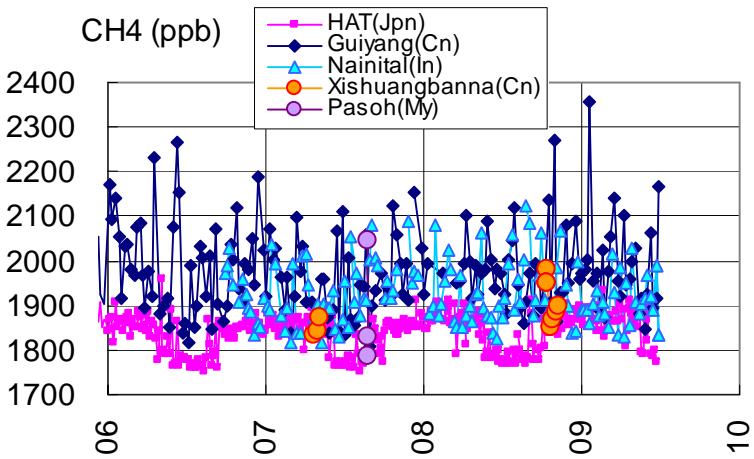

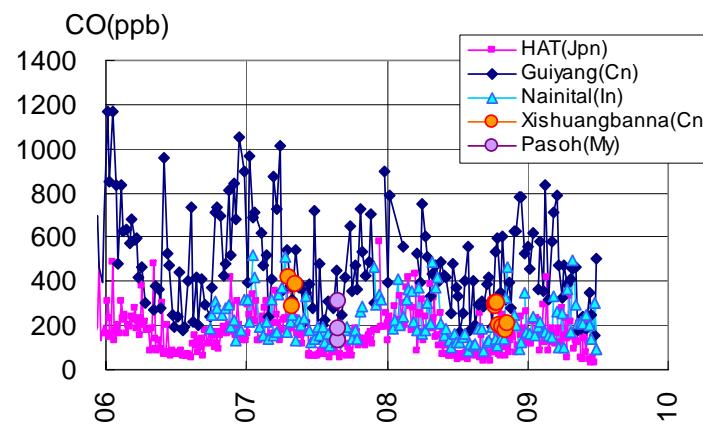

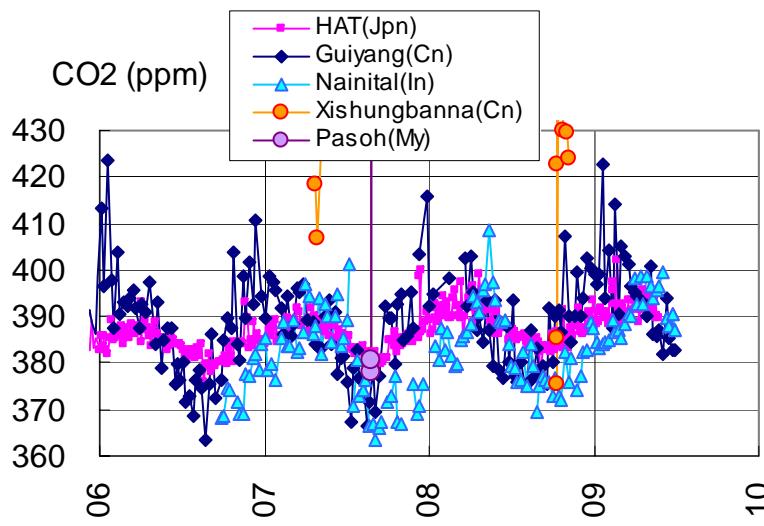

Fig. 1 Observation network in East Asia. Sites are shown in plots. Ship routes are shown in lines.

Sampling: Manish Naja (ARIES, Nainital)

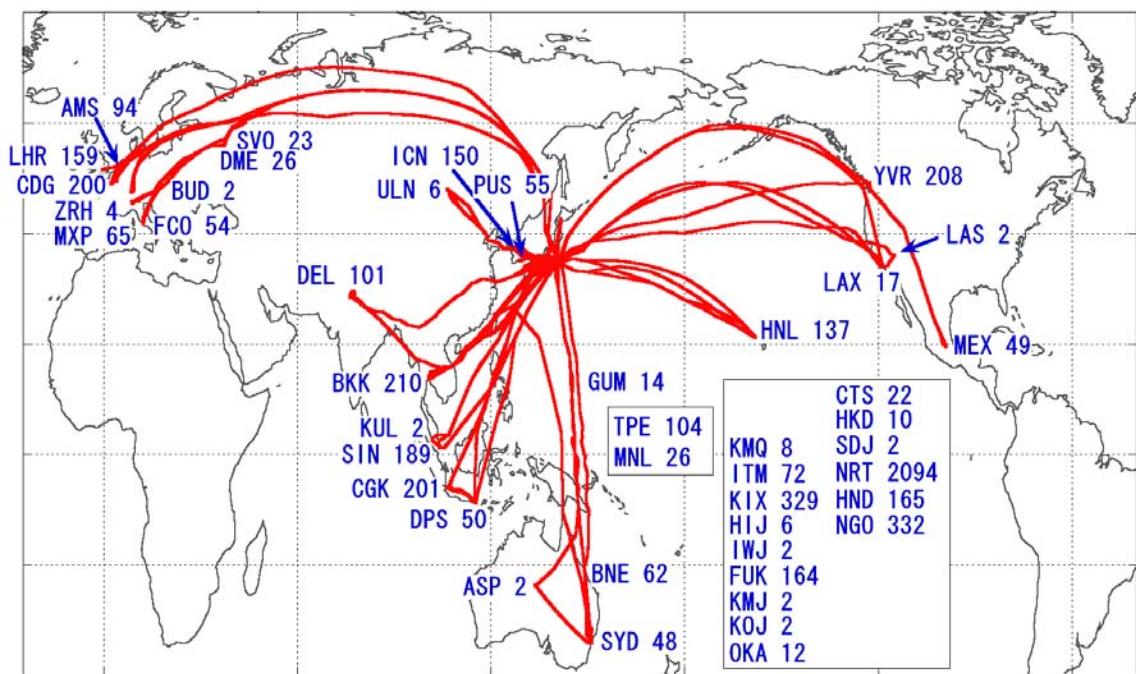

Flask Sampling: 2006 onwards

Analytical Lab: NIES, Japan

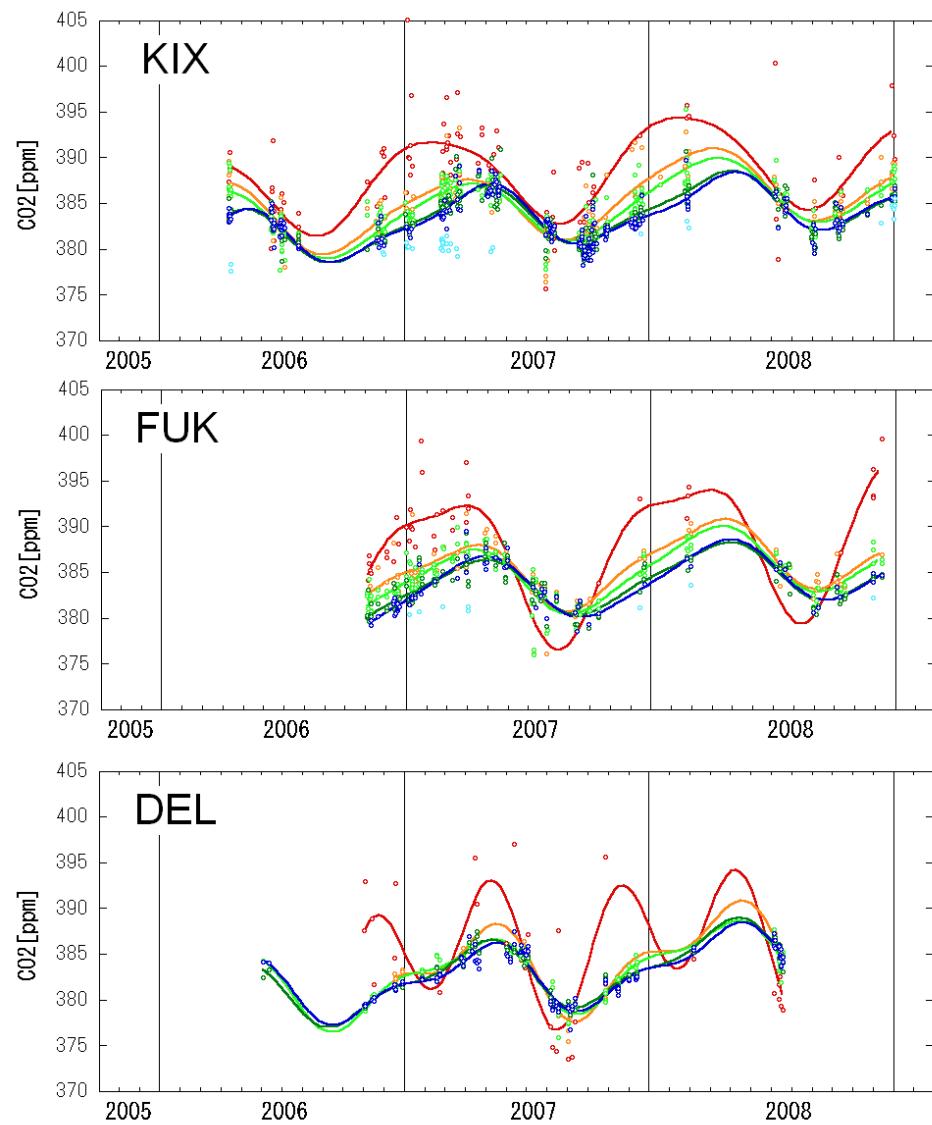

Fright routes and Frequency

From Nov. 2005 to Dec. 2008, we conducted more than 3,000 flight and 5,800 vertical profiles were obtained by CME.

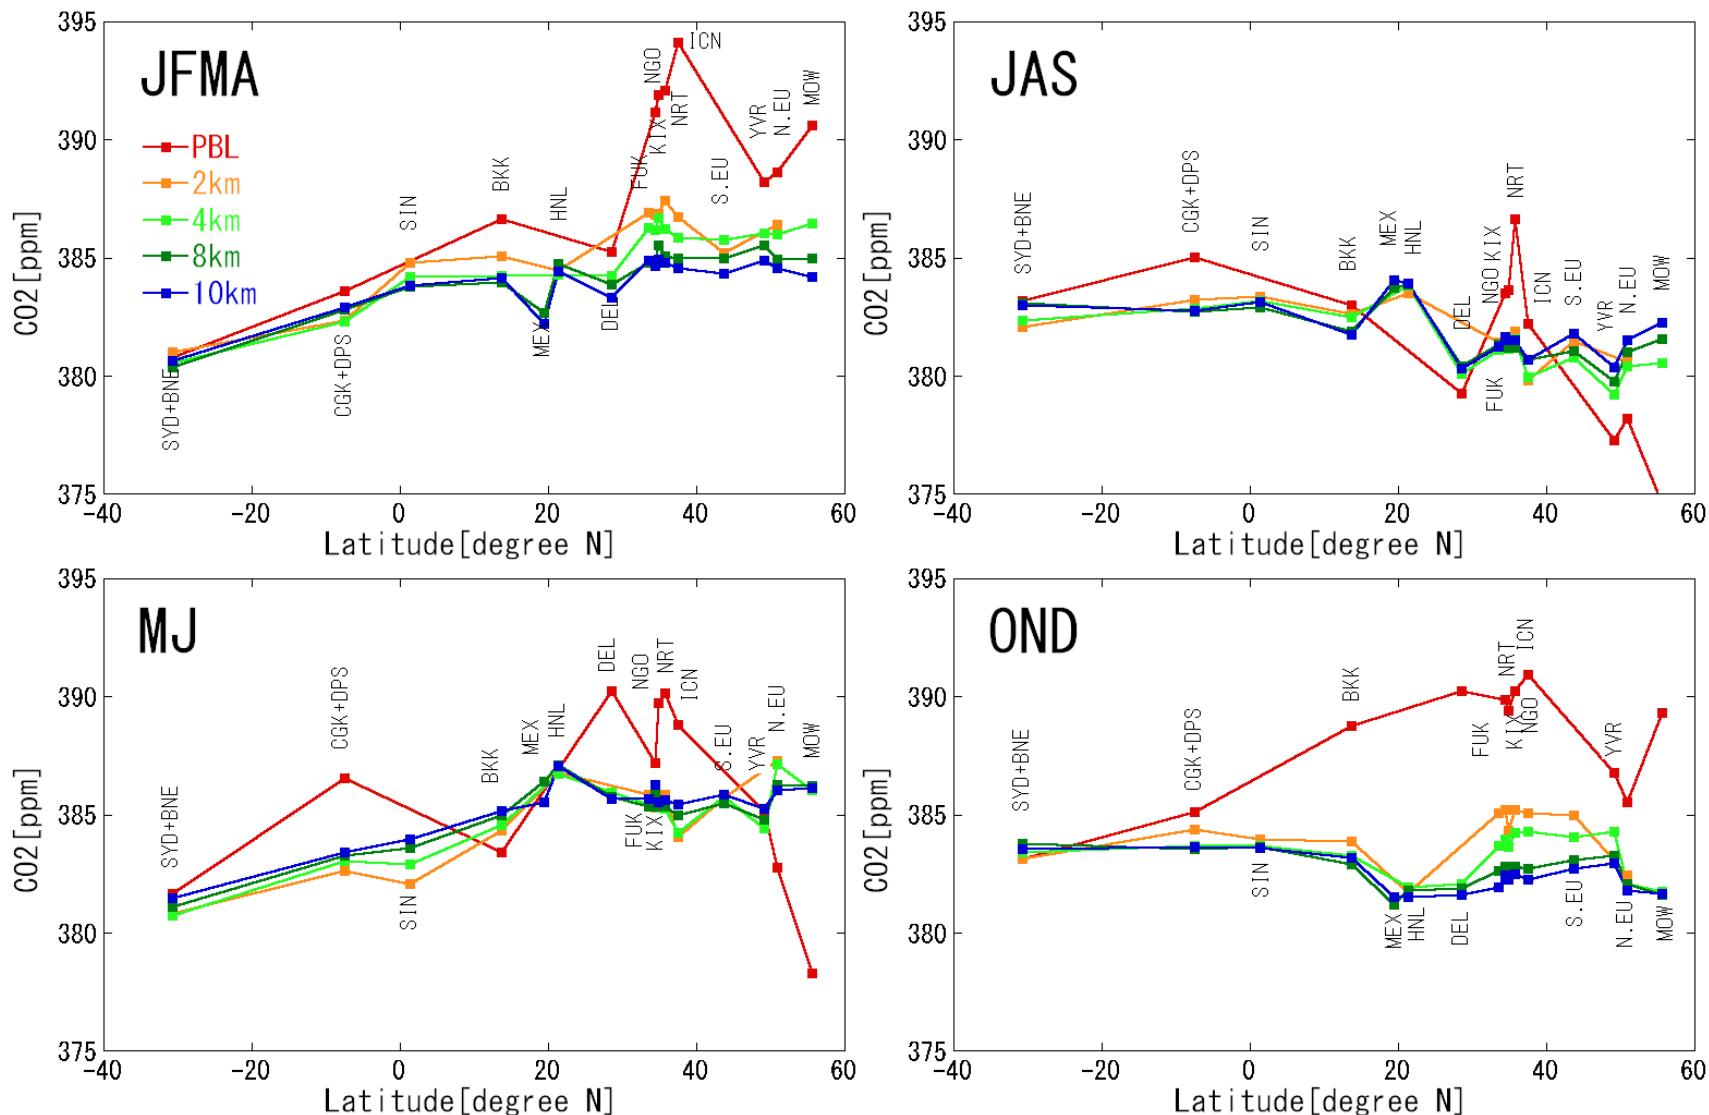

Sampling: T. Machida and Japan Airlines
In situ: 2005 onwards
NIES, Japan

Seasonal CO₂ Difference

In JAS and OND, no latitudinal gradient in FT in SH.
Northern summer CO₂ are lower than SH even in FT.
Vertical gradients in NH are small in MJ and negative in JAS.
Lower CO₂ in summer–fall lead low Delhi annual mean.
Not only summer low CO₂ but also winter high bring large amplitude over Moscow.

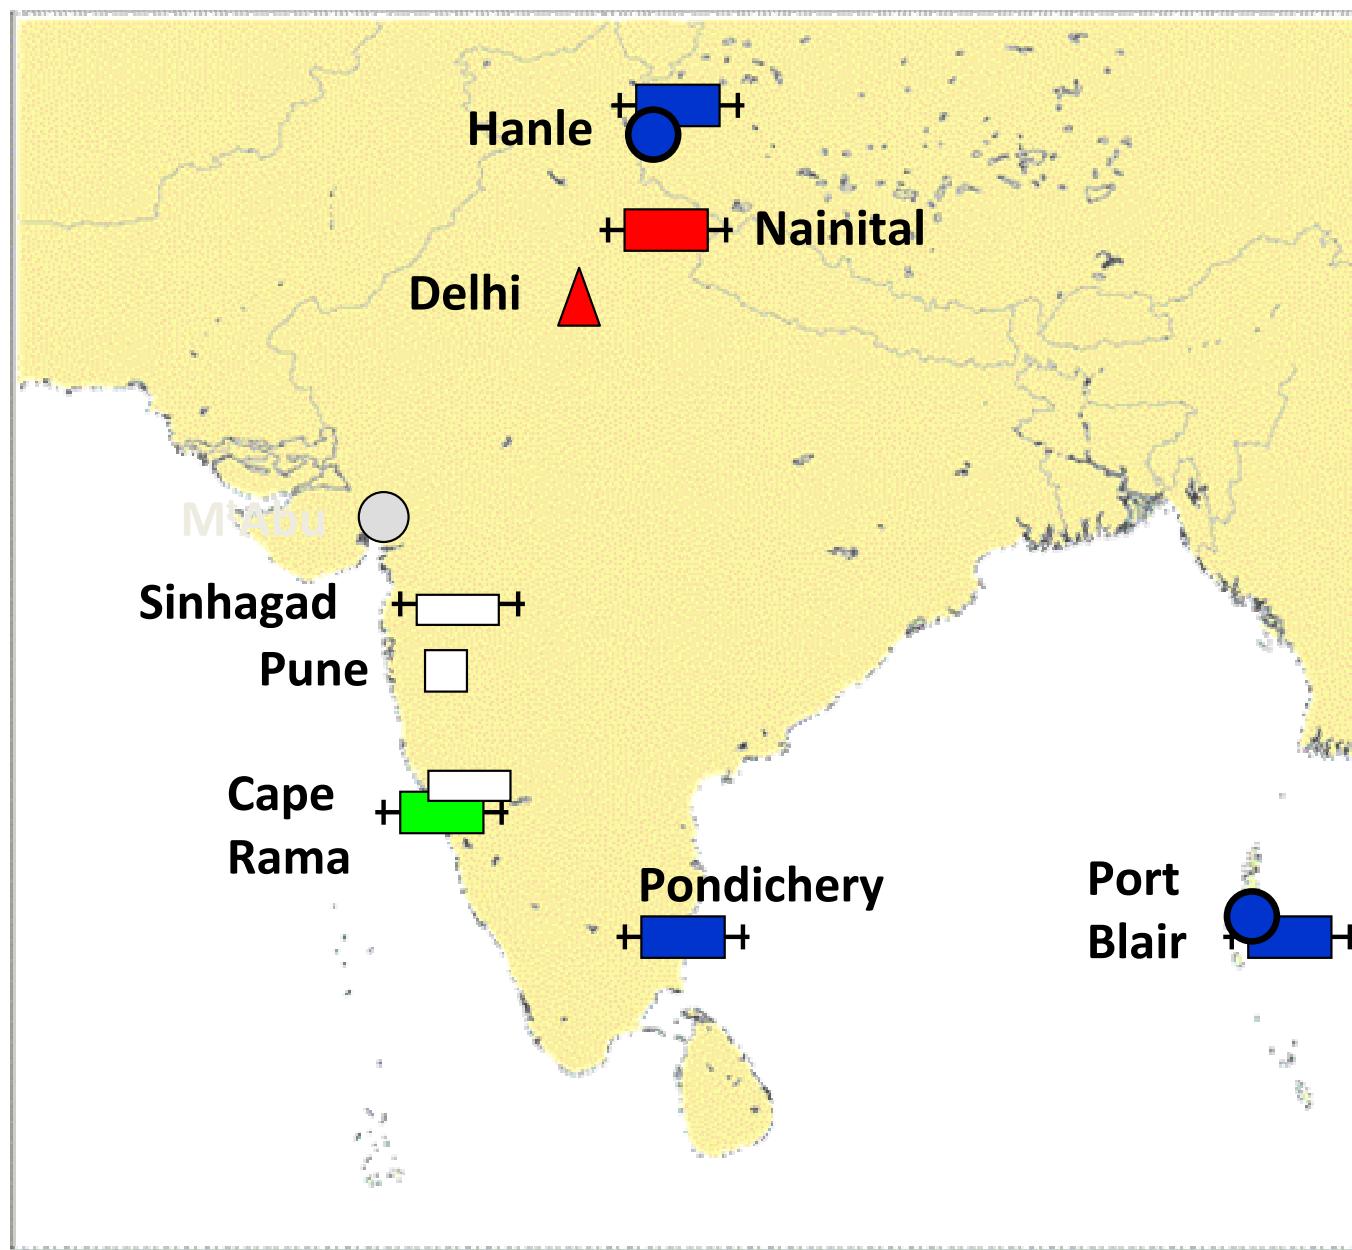

Flask analysis lab, Gas Chromatograph

At the Indian Institute of Tropical Meteorology (IITM), Pune, India

(Detectors: ECD, FID initially for CO₂, CH₄, N₂O)
(Reference standards: NOAA/ESRL)

Yogesh Tiwari, IITM, Pune, India
