

TTorch

Tall Tower and surface Observations Research network for verification of Climate relevant emissions of Human origin in Europe

Alex Vermeulen; Elena Popa (ECN, NL), TTorch SC

NEW ESF Research Networking Programme

Focus: non-CO₂ greenhouse gases → measurements & modeling

Objectives

- improve quality and consistency of observational system in Europe
- help extending the observational network in areas poorly covered (e.g. Eastern Europe)
- enhance the communication between scientists
- create a uniform database for the atmospheric measurement data

Activities

- exchange visits → first call closes 30 September 2009 !
- summer schools
- international workshops
- database
